9th Biennial Berry Health Benefits Symposium

Join a selection of the world's most renowned berry researchers as we gather in **Tampa Bay, Florida, USA on January 31st - February 2nd, 2023** and present the latest research that attracts media and consumer attention to berries as a superfruit. During the two and a half day program speakers will present their most current work in clinical, basic and applied research.

Sessions include:

- Berries and the Brain
- Berries and the Skin
- Berries and Gut Health/Gut Microflora
- Berries and the Heart/Healthy Aging
- Berry Special Topics
- Seminar Sessions
- Poster Sessions
- Exhibit Session

The symposium will also offer a 1/2 day **chartered bus tour** to discover Florida berry farms, the University of Florida Gulf Coast Research and Education Center Balm Campus and closing dinner at the Florida Strawberry Growers Association Pavilion in Plant City.
